The existing Articles of Association of the Company ("Existing Articles") was adopted on July 27, 2012 and was based on the Companies Act, 1956, as amended from time to time. With the implementation of the Companies Act, 2013 and its allied rules, the provisions of Companies Act, 1956 are getting repealed in a phased manner.

The Board of Directors of the Company believe that it is desirable that the relevant clauses in the Articles of Association of the Company be revised so that they fully reflect not only the law governing the Company and rules and regulations

MANAGEMENT DISCUSSION AND ANALYSIS

Industry Overview:

The Company being a Non Banking Financial Company (NBFC) registered with Reserve Bank of India, is mainly engaged in the business of providing Loans and making Investment in Shares and Securities. Hence the business strategy of the company is largely dependent on the Economic environment in India and policies of the Government of India and Reserve Bank of India (RBI).

During FY 2013-14, the Global Economy sent out mixed signs of recovery led by the strengthening of the US economy, a muted recovery in the Euro Zone and slowdown in the Chinese economy. The Indian Economy grew by 4.7% in 2013-14; the second successive year of sub-5% growth. India's macro factors continued to witness a challenging environment in FY'14 with low GDP Growth, contraction in Index of Industrial Production, Rupee Volatility, higher Fiscal Deficit, persistent Inflation, high volatility in Capital Markets and delays in Policy Formulation. These factors led to weak industrial growth, tight monetary conditions and stalling of the investment cycle. The Repo rate was increased by 75 bps to 8 percent by RBI during the year and the focus for considering the inflation shifted from wholesale Price Index (WPI) to Consumer Price Index (CPI). During FY'14, CPI inflation was about 9.49% while WPI inflation was at 5.98%

Future Outlook, Risk and Concerns

The Macro picture of India is expected to improve with a stable Government having a clear majority, coming to power. A new era of optimism and resurgence in economic growth has improved investor sentiments. As per the new Government's first Economic Survey, India's economy is expected to grow between 5.4 percent and 5.9 percent in FY'15. The Economic Survey 2013-14, expects that moderation in inflation will ease the monetary policy stance and revive the confidence of investors. As regards the downside risks, the Survey lists factors like poor monsoon, the external environment and the poor investment climate. RBI has set CPI inflation target of 8 percent by January, 2015 and 6 percent by January, 2016. The new Government is expected to announce key financial reforms and clear obstacles to revive the investment cycle, kick-start infrastructure projects, accelerate industrial growth and maintain fiscal discipline in order to put the economy back on a strong growth path. Revival in the Indian economy and acceleration of industrial growth is expected to have a positive impact on the overall performance of the company.

The Company's income majorly consists of Interest on Loans, Bonds and Fixed Deposits; Dividends from investments in Shares, Mutual Funds and Securities; Income from sale of such Investments. The performance of the company is closely linked with the overall performance of the Indian Economy, Financial and Capital Markets. The future success of the company depends on its ability to anticipate volatility in Capital and Financial Markets and minimise related risks through prudent investing decisions. Hence the Management regularly monitors the changing Economic and Market conditions in order to take timely and prudent business decisions. Any slowdown in the Indian economy or volatility in the Financial and/or Capital markets could adversely affect the performance of the company.

Note No. 1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Basis of Preparation

The financial statement of the company has been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The company has prepared these financial statements to comply in all material respects with the accounting standards notified under the Companies (Accounting Standards) Rules, 2006 (as amended) and the relevant provisions of the Companies Act, 1956. The financial statements have been prepared on an accrual basis and under the historical cost convention.

b) Use of estimate

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and action, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

c) Recognition of Income & Expenditure

Revenues/Income and Costs/Expenditure are generally accounted for on accrual basis, as these are earned or incurred.

d) Fixed Assets

Fixed Assets are stated at cost of acquisition or construction less accumulated depreciation. Cost of acquisition is inclusive of freight, duties, taxes and other incidental expenses up to the date of installation/commissioning of assets.

e) Depreciation

Depreciation has been provided for on written down value method at the rates in force from time to time as per the Schedule XIV of the Companies Act, 1956.

f) Investments

Investments are generally shown at cost. Provision for diminution in value is made if the fall is other than temporary in nature.

g) Inventories

Inventories of stock in trade are valued at cost or market value whichever is lower.

h) Taxes on Income

Provision for current tax made in accordance with the provisions of the Income-tax Act, 1961, and after taking into consideration, benefits admissible therein. Deferred tax resulting from "timing difference" between taxable and accounting income is accounted for using the tax rates and laws that are enacted or substantially enacted as on the balance sheet date. The deferred tax asset is recognized and carried forward only to the extent that there is virtual certainty that the asset will be realized in future.

Minimum Alternate Tax (MAT) credit is recognized as an asset only when and to the extent there is convincing evidence that the company will pay normal tax during the specified period. In the year in which MAT credit becomes eligible to be recognized as an asset in accordance with the recommendations contained in the Guidance Note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the Profit and Loss Account and shown as MAT Credit entitlement as a separate line item. The Company reviews the same at each Balance Sheet date and write down the carrying amount of MAT Credit entitlement to the extent there is no longer convincing evidence to the effect that the company will pay normal tax during the specified period.

i) Provisions, Contingent Liabilities and Contingent Assets

A provision is made when there is a present obligation as a result of past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. The Company does not recognized assets which are of contingent nature until there is virtual certainty of reliability of such assets. However, if it has become virtually certain that an inflow of economic benefits will arise, asset and related income is recognized in then financial statements of the period in which the change occurs.
